

# Magento 2x User Setup

This document will walk you through authenticating **Orderv** with your Magento version 2 store.

- **Create a New Integration**

An integration is the term for a connection between your Magento store and the Orderv app.

- From your Magento 2 store's admin page, click **System** followed by **Integrations**.
- Click **Add New Integration**
- In the **Integration Info** tab you will be presented with a form.
  - Name the integration **Orderv**
  - You can leave the **Email** field blank
  - Enter the following into the **Callback URL** field:
    - <https://www.orderv.com/auth/magento/oauth>
  - Enter the following into the **Identity Link URL** field:
    - <https://www.orderv.com/auth/magento/login>
- In the **API** tab you'll select the store resources that Orderv will have access to
  - From the **Resource Access** dropdown, choose **Custom**
  - Check the following:
    - Sales->Operations->Orders->Actions->View
    - Sales->Operations->Orders->Invoices
    - Sales->Operations->Orders->Shipments
    - Sales->Operations->Orders->Credit Memos
    - Products->Inventory->Catalog
    - Customers->All Customers
  - When finished, your page should look like this:  
[https://www.orderv.com/bundles/ordervcore/img/support/magento\\_auth/magento2x\\_api\\_permissions.png](https://www.orderv.com/bundles/ordervcore/img/support/magento_auth/magento2x_api_permissions.png)
- Click **Save** in the top right and the integration will be created

- **Authorize the Integration with Orderv**

- After you save the integration you'll be brought back to the Magento Admin's list of integrations for your store.
- Find the entry you just created and click the **Authorize** link
- You will be presented with a confirmation page listing the permissions you selected for the Orderv integration. Click **Authorize**.
- You will be redirected to the **Orderv Login Page**. Either log in or create an account.
- After logging in you'll be taken to the **Orderv Dashboard** and you will receive a notification about the authorization process' success.

That's it! You've successfully authenticated Orderv with your Magento 2 store. If you run into any issues or have some feedback for us please send an email to [support@orderv.com](mailto:support@orderv.com).
